SULTAN ABDUL HALIM MU'ADZAM SHAH

PROGRAMME HANDBOOK DIPLOMA MECHANICAL ENGINEERING (PLANT)

1.0 INTRODUCTION

Politeknik Sultan Abdul Halim Mu'adzam Shah (POLIMAS) is a comprehensive, learner-centered higher education institution that serves its local and regional learners and their communities through high-quality and flexible education and training. It is aimed to develop students' employability skills to meet the needs of a more dynamic economy, which values innovation and productivity. Programs include a global perspective that will enable graduates to make a valuable contribution to the wider society as it changes in response to regional and international competition and demand.

POLIMAS programmes include a variety of Outcome-Based Education teaching approaches, adding value to POLIMAS teaching and learning which cater to students seeking a quality polytechnic education and training.

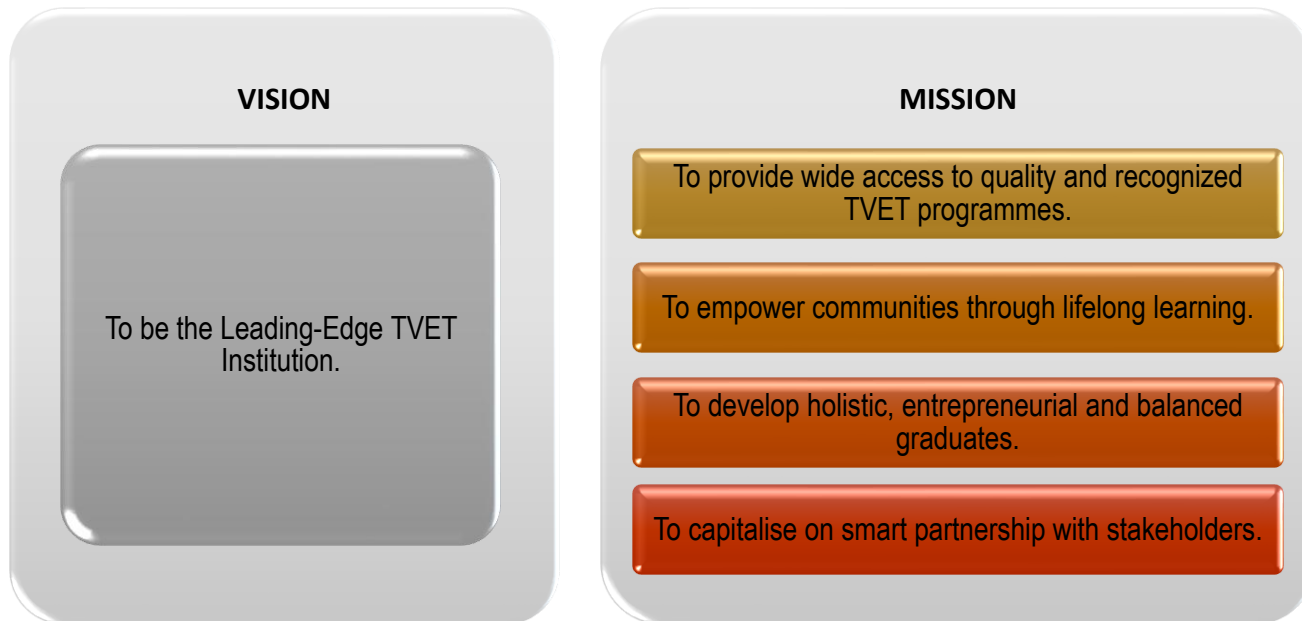

The POLIMAS Programme Handbook provides students with information on many facets of college life such as policies, procedures, and services. It is written for every student enrolled in one or more courses at POLIMAS.

This Handbook is aimed to guide students through the various procedural steps that lead to a Diploma study. It also provides graduate program descriptions, the requirements needed to obtain a graduate Diploma, and a clear outline of the procedural steps that students need to follow. Students are also provided with information on matters related to general administration such as student services and facilities, campus disciplinary measures, student organizations and other relevant matters.

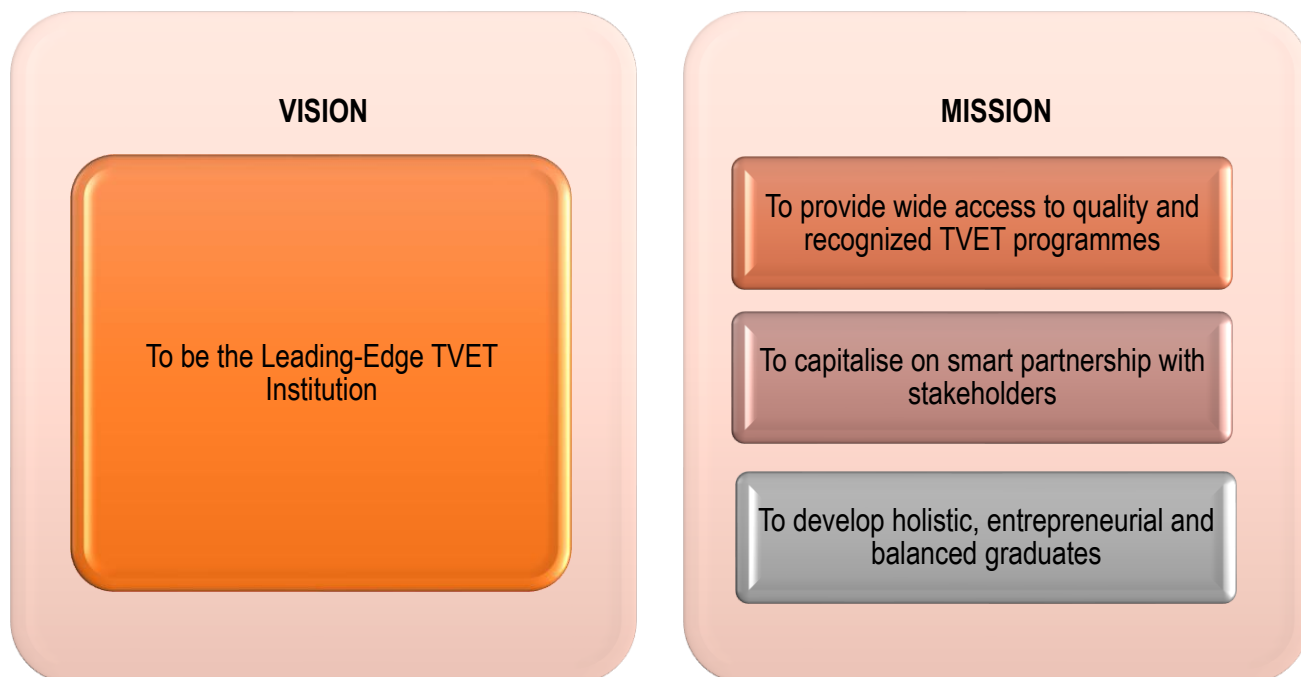

This book serves as a preliminary guide and does not purport to completely address every policy, procedure and regulation. In addition, no claim is made that this document covers all the rules and regulations in effect now at POLIMAS. Students must refer to their event POLIMAS Department programmes and services publications and other Departments and Units Policies for further information.

ACADEMIC FLOW CHART FOR SEMESTER

ACADEMIC FLOW CHART FOR SHORT SEMESTER

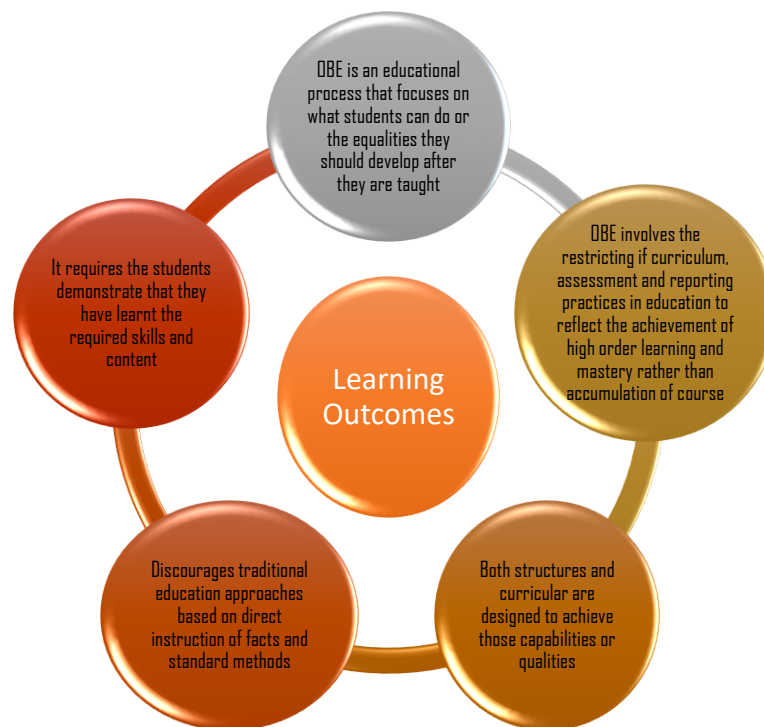

4.0 OUTCOME-BASED EDUCATION [OBE]

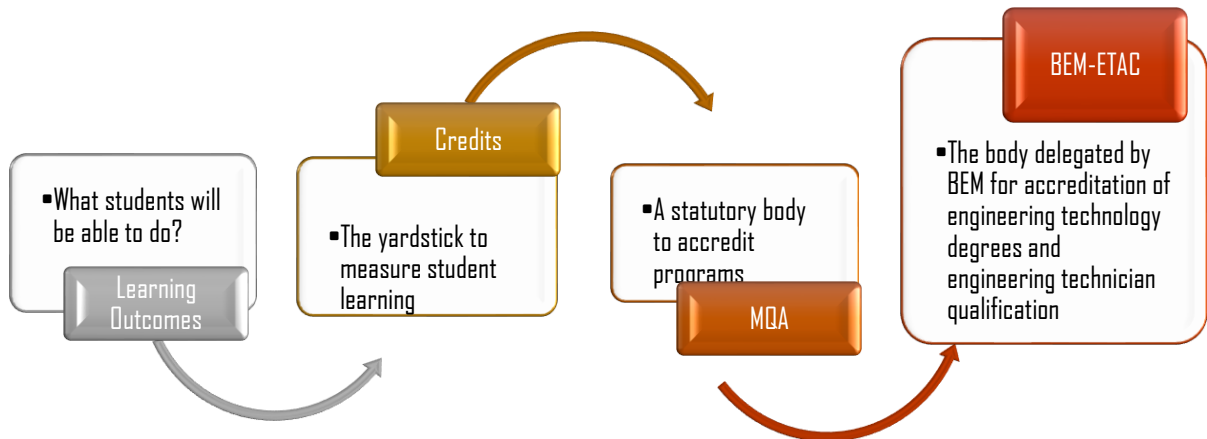

Outcome-based education (OBE) is an educational model for students to demonstrate their knowledge and able to perform according to the required outcomes. It is a student- centered approach that focuses on students' learning. It starts with a clear picture of what students should know, what they should be able to do, and what desirable attitudes and values needed to organize the curriculum, instruction, and assessment to ensure an ultimate learning (Spady, 1994:1). Thus, OBE involves the restructuring of curriculum and assessment that reflects achievement of high learning order and mastery learning.

OBE helps students to be aware of what they should learn, aware of what they are learning, and the control over their learning. It leads to successful student learning and encourages lecturers to be well prepared. It also provides students with appropriate, purposeful learning experiences and opportunities for students to develop originality, self-motivation and independence while acquiring useful knowledge and skills.

6.3 PROGRAMME OF DIPLOMA IN MECHANICAL ENGINEERING (PLANT)

6.3.1 PROGRAMME OVERVIEW

SYNOPSIS

Diploma in Mechatronic Engineering programme is designed to produce holistic graduates that have knowledge and competent skills in the field of mechatronic engineering to fulfil the demand of workers in engineering sector. Five components related to the programme have been identified. Components make up the BOK for Diploma in Mechatronic Engineering are namely Technical, Personal Development, Mathematics, Science and Workplace Competencies. Technical Components is Electronic system, Mechanical System, Computers and Control Systems.

6.3.2 JOB PROSPECT

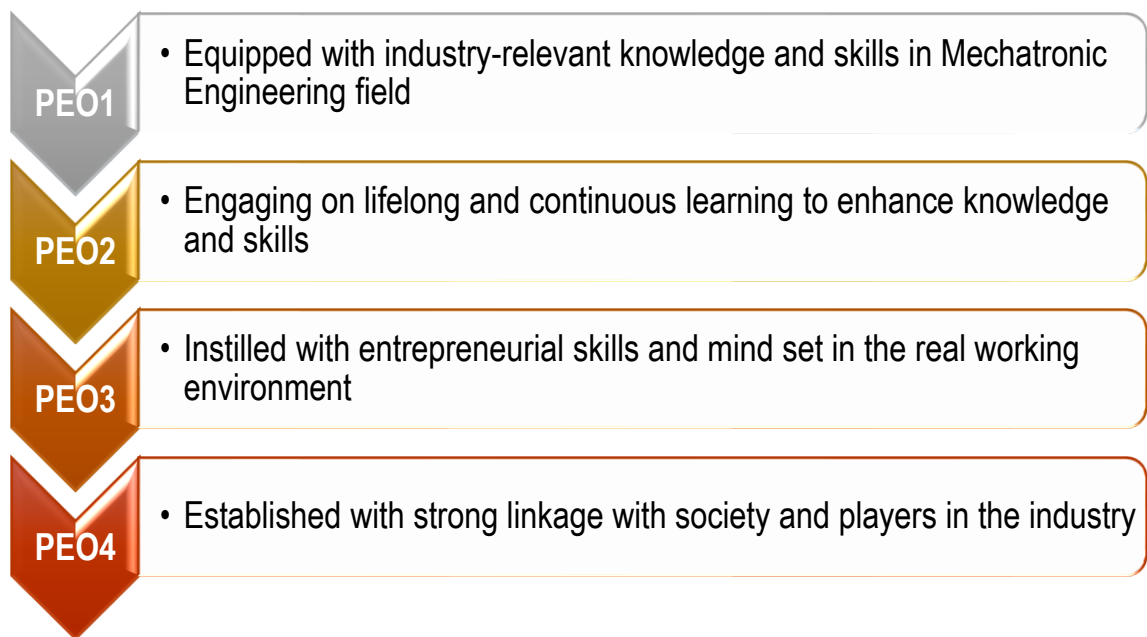

This programme provides the knowledge and skills in the Mechanical Engineering (Plant) field that can be applied to a broad range of careers in Mechanical Engineering. The knowledge and skills that the students acquire from the programme will enable them to participate in the job market as:

- ❖ Technician
- ❖ Technical Assistant
- ❖ Plant / Steam Engineer Assistant
- ❖ Boilerman Apprentice
- ❖ Steam Engineer Apprentice
- ❖ Internal Combustion Engineer Assistant
- ❖ Supervisor
- ❖ Assistant Engineer
- ❖ Technical Instructor / Sales Executive
- ❖ Industrial Inspector
- ❖ Pipe Drafting & Designer
- ❖ Entrepreneur

6.3.3 PROGRAMME AIMS

The programme believes that every individual has potential and the programme aims to develop adaptable and responsible Senior Assistant Mechatronic Engineers to support government aspiration to increase workforce in engineering related field.

6.3.4 PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

6.3.5 PROGRAMME LEARNING OUTCOMES (PLO)

Upon completion of the programme, the graduates should be able to:

PLO1	<ul style="list-style-type: none">• Apply knowledge of applied mathematics, applied science, engineering fundamentals and an engineering specialisation as specified in DK1 to DK4 respectively for practical procedures and practices
PLO2	<ul style="list-style-type: none">• Identify and analyse well-defined engineering problems reaching substantiated conclusions using codified methods of analysis specific to their field of activity (DK1 to DK4)
PLO3	<ul style="list-style-type: none">• Design solutions for well-defined technical problems and assist with the design of systems, components or processes to meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations (DK5)
PLO4	<ul style="list-style-type: none">• Conduct investigations of well-defined problems; locate and search relevant codes and catalogues, conduct standard tests and measurements
PLO5	<ul style="list-style-type: none">• Apply appropriate techniques, resources, and modern engineering and IT tools to well-defined engineering problems, with an awareness of the limitations (DK6)
PLO6	<ul style="list-style-type: none">• Demonstrate knowledge of the societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering technician practice and solutions to well-defined engineering problems (DK7)
PLO7	<ul style="list-style-type: none">• Understand and evaluate the sustainability and impact of engineering technician work in the solution of well-defined engineering problems in societal and environmental contexts (DK7)
PLO8	<ul style="list-style-type: none">• Understand and commit to professional ethics and responsibilities and norms of technician practice
PLO9	<ul style="list-style-type: none">• Function effectively as an individual, and as a member in diverse technical teams PLO10: communicate effectively on well-defined engineering activities with the engineering community and with society at large, by being able to comprehend the work of others, document their own work, and give and receive clear instructions
PLO11	<ul style="list-style-type: none">• Demonstrate knowledge and understanding of engineering management principles and apply these to one's own work, as a member or leader in a technical team and to manage projects in multidisciplinary environments
PLO12	<ul style="list-style-type: none">• Recognise the need for, and have the ability to engage in independent updating in the context of specialised technical knowledge

6.3.6 PROGRAMME STRUCTURE FOR DIPLOMA IN MECHANICAL ENGINEERING (PLANT)

**MECHANICAL ENGINEERING DEPARTMENT
DIPLOMA IN MECHANICAL ENGINEERING (PLANT) - DJL
PROGRAMME STRUCTURE**

SEMESTER 1				
NO	COURSE CODE	COURSE	CREDIT HOUR	PREREQUISITE
1	DUE10012	Communicative English 1	2	
2	MPU24XX1	Sukan	1	
		Unit Beruniform 1		
3	DUW10022	Occupational Safety and Health for Engineering	2	
4	DBS10012	Engineering Science	2	
5	DBM10013	Engineering Mathematics 1	3	
6	DJJ10013	Engineering Drawing	3	
7	DJJ10022	Mechanical Workshop Practice 1	2	
8	DJJ10033	Workshop Technology	3

1	DUD10012	Design Thinking	2	

Legend:

*For Muslim

Students

**For Non Muslim

Students

***Only one (1) elective course can be chosen either in semester 4 or 5

Notes:

1. ***Free Electives** are courses which are not included in any programme structure but if taken, will contribute towards students' CGPA, provided that institutions adhere to the Jabatan Pendidikan Politeknik & Kolej Komuniti Free Electives

Guidelines.

2. **MPU22042 Bahasa Kebangsaan A** is **COMPULSORY** for students who did not attain credit in Bahasa Melayu at Sijil

Pelajaran Malaysia (SPM) level and will contribute to students' CGPA.

3. Co-curriculum

pathways:

Path1: Sport and

Club

Path 2: Uniform Unit (Students are required to **PASS** Uniform Unit 1 as a prerequisite to Uniform Unit 2)

6.3.7 SYNOPSIS AND COURSE LEARNING OUTCOMES (CLO)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
1	DUW10022 OCCUPATIONAL SAFETY AND HEALTH FOR ENGINEERING	<p>OCCUPATIONAL SAFETY AND HEALTH FOR ENGINEERING designed to impart understanding of the self-regulatory concepts and provisions under the Occupational Safety & Health Act (OSHA). This course presents the responsibilities of workers in implementing and complying with the safety procedures at work. Understanding of notifications of accidents, dangerous occurrence, poisoning and diseases and liability for offences will be imparted upon students. This course will also provide an understanding of the key issues in OSH Management, Incident Prevention, Fire Safety, Hazard Identification Risk Control and Risk Assessment (HIRARC), Workplace Environment and Ergonomics and guide the students gradually into this multi-disciplinary science.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain briefly Occupational Safety and Health (OSH) procedures, regulation and its compliance in Malaysia. (C2, PLO1) 2. CLO2: Initiates incident hazards, risks and safe work practices in order to maintain health and safe work environment. (A3, PLO8) 3. CLO3: Demonstrate communication skill in group to explain the factor that can lead to accident in workplace. (A3, PLO10)
2	DBS10012 ENGINEERING SCIENCE	<p>ENGINEERING SCIENCE introduces the physical concepts required in engineering disciplines. Students will learn the knowledge of fundamental physics in order to identify and solve engineering physics problems. Students will be able to perform experiments and activities to mastery physics concepts.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Use basic physics concept to solve engineering physics problems (C3, CLS1) 2. Apply knowledge of fundamental physics in activities to mastery physics concept (C3, CLS 1) 3. Perform appropriate activities related to physics concept (P3, CLS 3a)
3	DBM10013 ENGINEERING MATHEMATICS 1	<p>ENGINEERING MATHEMATICS 1 exposes students to the basic algebra including resolve partial fractions. This course also covers the concept of trigonometry and the method to solve trigonometry problems by using basic identities, compound angle and double angle formulae. Students will be introduced to the theory of complex number and concept of vector and scalar. Students will explore advanced matrices involving 3x3 matrix.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Use mathematical statement to describe relationship between various physical phenomena. (C3, CLS1) 2. Show mathematical solutions using the appropriate techniques in mathematics. (C3, CLS3c) 3. Use mathematical expression in describing real engineering problems precisely, concisely and logically. (A3, CLS3b)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
4	DJJ10013 ENGINEERING DRAWING	<p>ENGINEERING DRAWING provides the students with the fundamentals of technical drawings and the application Computer Aided Design (CAD) software. For technical drawing, it emphasizes on the practical knowledge of drawing instruments and drawing techniques while for the CAD student will learn to navigate and use the software to create 2D drawing design in engineering. Students shall be able to demonstrate competency in using some standard available features of technical drawing and CAD application to create and manipulate objects or elements in engineering drawing.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Apply the fundamentals of technical drawing and features of CAD software in producing engineering drawing. (C3, P1) 2. Construct the technical drawing and 2D CAD drawing according to the engineering drawing standards. (P3, PLO5) 3. Propose a project report with following engineering norms and practices in engineering drawing. (A3, PLO8)
5	DJJ10022 MECHANICAL WORKSHOP PRACTICE 1	<p>MECHANICAL WORKSHOP PRACTICE 1 exposes the students to welding, machining and fitting which involve the use of arc and gas welding machine, lathe machine, drilling machine, grinding, hand tools, marking out tools, measuring and testing tools. Students are also taught to emphasize on safety procedures and cleanliness in the workshop.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Measure finished product using appropriate measurement instruments. (P3, PLO5) 2. Perform fitting, welding and machining works according to Standard Operational Procedure (SOP). (P4, PLO5) 3. Demonstrate an understanding of professional ethics, responsibilities and norms of engineering practices according to the workshop safety regulation. (A3, PLO6)
6	DJJ10033 WORKSHOP TECHNOLOGY	<p>WORKSHOP TECHNOLOGY provides exposure and knowledge in using hand tools, machine operation such as drilling, lathe, milling and computer numerical control. It also covers on gear measurement and inspection welding process in oxy acetylene, Shielded Metal Arc Welding (SMAW), Gas Tungsten Arc Welding (GTAW) and Gas Metal Arc Welding (GMAW).</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Apply the knowledge of basic mechanical components and equipment, hand tools and measuring equipment in workshop technology (C3, PLO1) 2. Apply standard practice in operating mechanical tools and component (C3, PLO8) 3. Demonstrate continuous learning and information management skills to complete assigned task (A3, PLO12)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
7	MPU23052 SAINS, TEKNOLOGI DAN KEJURUTERAAN DALAM ISLAM*	<p>SAINS TEKNOLOGI DAN KEJURUTERAAN DALAM ISLAM memberi pengetahuan tentang Konsep Islam sebagai Ad Din dan seterusnya membincangkan konsep sains, teknologi dan kejuruteraan dalam Islam serta impaknya, pencapaiannya dalam tamadun Islam, prinsip serta peranan syariah dan etika Islam, peranan kaedah fiqh serta aplikasinya.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Melaksanakan dengan yakin amalan Islam dalam kehidupan seharian. 2. Menerangkan etika dan profesionalisme berkaitan sains teknologi dan kejuruteraan dalam Islam. 3. Menghubunkait minda ingi tahu dengan prinsip syariah, etika dan kaedah fiqh dalam bidang sains, teknologi dan kejuruteraan menurut perspektif Islam.
8	MPU23042 NILAI MASYARAKAT MALAYSIA**	<p>NILAI MASYARAKAT MALAYSIA membincangkan aspek sejarah pembentukan masyarakat, nilai-nilai agama, adat resam dan budaya masyarakat di Malaysia. Selain itu, pelajar dapat mempelajari tanggungjawab sebagai individu dan nilai pepaduan dalam kehidupan di samping cabaran-cabaran dalam membentuk masyarakat Malaysia.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Membincangkan sejarah dan nilai dlam pembentukan masyarakat di Malaysia 2. Menerangkan etika dan profesionalisme terhadap konsep perpaduan bagi meningkatkan semangat patriotisme masyarakat Malaysia. 3. Menghubunkait minda ingin tahu dengan cabaran-cabaran dalam membentuk masyarakat Malaysia.
9	DBM20023 ENGINEERING MATHEMATICS 2	<p>ENGINEERING MATHEMATICS 2 exposes students to the basic laws of indices and logarithms. This course introduces the basic rules of differentiation concepts to solve problems that relates maximum, minimum and calculate the rates of changes. This course discusses integration concepts in order to strengthen student's knowledge for solving area and volume bounded region problems. In addition, students will learn application of both techniques of differentiation and integration.</p> <p>Credit(S): 3 Pre-Requisite(S): DBM10013</p>	<ol style="list-style-type: none"> 1. Use algebra and calculus knowledge to describe relationship between various physical phenomena. (C3,CLS 1) 2. Solve the mathematical problems by using appropriate and relevant fundamental calculus techniques. (C3,CLS 3c) 3. Use mathematical language to express mathematical ideas and arguments precisely, concisely and logically in calculus (A3,CLS 3b)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
10	DJJ20053 ELECTRICAL TECHNOLOGY	<p>ELECTRICAL TECHNOLOGY exposes students to the basic electrical circuit concepts, the application of electromagnetism in electrical machines and transformers. The course focuses on the different types of electrical circuits, the relationship between current and voltage including the resistance. It also provides the skills on the methods of constructing basic circuits and operation of electrical machines and transformers. This course also exposes the students to the demonstration of experiments in Electrical Engineering.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain the principles and fundamental of electrical circuits, electromagnetism, transformers and electrical machine (C2, PLO1) 2. Solve the problem related to electrical circuits, electromagnetism, transformers and electrical machine (C3, PLO1) 3. Organize appropriately experiments in groups according to the Standard Operating Procedures. (P4, PLO5)
11	DJJ 20063 THERMODYNAMICS	<p>THERMODYNAMICS provides knowledge of theory, concept and application of principles to solve problems related to thermodynamics. It emphasizes on concept of non-flow process and flow process, properties of steam, Carnot cycle and Rankine cycle. This course also exposes the students to the demonstration of experiments in Thermodynamics by using the real equipment.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain fundamentals concept and properties of pure substances in thermodynamics (C2, PLO1) 2. Apply Laws of thermodynamics and it processes (C3, PLO1) 3. Organize appropriately experiments according to the Standard Operating Procedures (P4, PLO5)
12	DJJ 20073 FLUID MECHANICS	<p>FLUID MECHANICS provides students with a strong understanding of the fundamentals of fluid mechanics principles related to the fluid properties and behavior in static and dynamic situations. This course also exposes the students to the demonstration at the real equipment of fluid mechanics.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain the fundamentals of fluid (C2, PLO1) 2. Solve problems related to fluid properties, fluid statics and fluid dynamics (C3, PLO1) 3. Organize appropriate experiments in groups according to the standard operating procedures (P4, PLO5)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
13	DJL20012 PLANT MAINTENANCE	<p>PLANT MAINTENANCE covers basic mechanical components and maintenance procedure needs in plant. This course provide knowledge and skills regarding to maintenance principles and procedures, lubrication, power transmission, bearing, valves and condition monitoring on plant equipment.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain the use of mechanical components and basic concept of maintenance in plant (C2, PLO1) 2. Perform maintenance activity on the plant equipment according to the job tasks (P3, PLO5) 3. Demonstrate a good practice and report writing in plant maintenance base on the standard operating procedure (A3, PLO8)
14	DBM30033 ENGINEERING MATHEMATICS 3	<p>ENGINEERING MATHEMATICS 3 exposes students to the statistical and probability concepts and their applications in interpreting data. The course also introduces numerical methods concept to solve simultaneous equations by using Gaussian Elimination method, LU Decomposition using Doolittle and Crout methods, polynomial problems using Simple Fixed-Point Iteration and Newton-Raphson methods. In order to strengthen the students in solving engineering problems, Ordinary Differential Equation (ODE) is also included. In additional, the course also discusses optimization problems by using Linear Programming. It is designed to build students' teamwork and problems solving skill.</p> <p>Credit(S): 3 Pre-Requisite(S): DBM20023</p>	<ol style="list-style-type: none"> 1. Demonstrate an understanding of the common body of knowledge in mathematics. (C3, CLS 1) 2. Demonstrate problems solving skills in engineering problems (C3, CLS 3c) 3. Use mathematical expression in describing real engineering problems precisely, concisely and logically. (A3, CLS 3b)
15	DJJ30093 ENGINEERING MECHANICS	<p>ENGINEERING MECHANICS focuses on theoretical knowledge in statics and dynamics. This course provides students with fundamental understanding of forces and equilibrium, resultants, equilibrium of a particles and structural analysis. This course also covers kinematics and kinetics of particles. This course also exposes the students to the demonstration of experiments in Engineering Mechanics.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Solve problems related to static and dynamics based on the concepts and principle of engineering mechanics (C3, PLO 1) 2. Analyze engineering related problems based on fundamentals of static and dynamics (C4, PLO 2) 3. Organize appropriately experiment in groups according to Standard Operation Procedures (P4, PLO 5)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
16	DJJ 30103 STRENGTH OF MATERIALS	<p>STRENGTH OF MATERIALS provides knowledge on concepts and calculation of forces on materials, thermal stress, shear force and bending moment, bending stress, shear stress and torsion in shafts. It also deals with the experiments conducted on tensile test, bending moment, shearing force and torsion and deflection.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Apply the concepts of strength of materials to solve related problems. (C3, PLO1) 2. Analyze problems correctly related to strength of materials. (C4, PLO2) 3. Organize appropriately experiment in groups according to Standard Operation Procedures (SOP). (P4, PLO5)
17	DJJ30113 MATERIAL SCIENCE AND ENGINEERING	<p>MATERIALS SCIENCE AND ENGINEERING course introduces students a comprehensive coverage of basic fundamentals of materials science and engineering. The course focuses on material structures, properties, fabrication methods, corrosion, thermal processing and material testing mostly of metals and alloys. New fabrication method of powder metallurgy are introduces to student to cater the fabrications of devices, sensors for Industry 4.0 technology.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Apply the fundamental of material science to identify the materials, properties, behavior, processes and treatment.(C3 ,PLO1) 2. Performed appropriate material testing according to the Standard Operating Procedures. (P4, PLO5) 3. Demonstrate the ability to work individually and in groups to complete assigned tasks during the practical work session. (A3 ,PLO9)
18	DJJ30122 COMPUTER AIDED DESIGN	<p>COMPUTER AIDED DESIGN exposes the students to the fundamentals and principles of 3D drawing using 3D CAD software. Students also equip with various method of creating a solid model using extrude, revolve, swept, assembly, simulation and animation. Hands-on exercises drawing of mechanical engineering will also be covered in this course.</p> <p>Credit(S): 2 Pre-Requisite(S): DJJ10013</p>	<ol style="list-style-type: none"> 1. Apply CAD commands in order to produce engineering drawing. (C3, PLO1) 2. Construct 3D drawing of Mechanical Components according Drawing Standards. (P4, PLO5) 3. Demonstrate a presentation with following technical standard Communication. (A3, PLO10)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
19	DJL30032 POWER PLANT ENGINEERING 1	<p>POWER PLANT ENGINEERING 1 provides exposure to students as the entry-level personnel into power generation industry for both utility and manufacturing process plant. Emphasis of the course is on general and basic operating principle including plant auxiliaries' equipment of various types of power plant such as steam power plant, gas turbine power plant, internal combustion engine, hydroelectric power plant and nuclear power plant. This course also covers the important of power plant engineering for sustainable country development, renewable energy and environmental issues.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Describe the applications, main components, related equipment, various arrangements, plant auxiliaries, classifications and comparison between various types of power plant. (C2,PLO1) 2. Generalize the concept of power generation including steam power plant, gas turbine power plant, internal combustion engine, hydro power plant, nuclear power plant, process cycle and terms used in power plant engineering. (C3,PLO3) 3. Justify the power generation engineering, environmental issues, renewable energy and its contribution to the sustainable development. (A3,PLO7)
20	DJJ 40132 ENGINEERING AND SOCIETY	<p>ENGINEERING AND SOCIETY focuses on the introduction to professional ethics, theory and philosophy of ethics, values in professional ethics, engineering bylaws and standards, issues in professional ethics and sustainability. It also relates towards IR 4.0 introduction and green engineering.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Implement the roles of engineering profession towards the developing of society and its challenges in globalization (C3, PLO6) 2. Determine the important of work ethics, by laws and professionalism in engineering profession. (C4, PLO8) 3. Determine the needs for sustainable and green engineering towards providing the solutions in engineering field. (C4, PLO7)
21	DJJ 40153 PNEUMATIC & HYDRAULICS	<p>PNEUMATIC & HYDRAULICS provides knowledge and understanding to the importance of pneumatics and hydraulics circuits, equipment and design along with its usage in the industry.</p> <p>Credit(S): 3 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Analyze the basic concept and function of pneumatics and hydraulics system. (C3, PLO1) 2. Design pneumatic, electro-pneumatic and hydraulic circuit according to assigned tasks. (C5, PLO3) 3. Perform experiment on pneumatic, electro-pneumatic and hydraulic circuit during practical session. (P4, PLO5)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
22	DJJ40182 PROJECT 1	PROJECT 1 provides students with solid foundation on knowledge and skills in formulating project proposal preparation, writing and presentation Credit(S): 2 Pre-Requisite(S): None	<ol style="list-style-type: none"> 1. Identify the engineering problems to be solved (C4, PLO2) 2. Analyze methods to solve problems (C4, PLO7) 3. Propose a solution to problems (A3, PLO11)
23	DJL30022 PLANT ENGINEERING PRACTICE	PLANT ENGINEERING PRACTICE provides hands-on skills for student in plant engineering. The experimental procedure, skill and report writing will strengthen the student knowledge. The learning components cover the equipment and operation related to the plant engineering. Credit(S): 2 Pre-Requisite(S): None	<ol style="list-style-type: none"> 1. Perform the experiments correctly according to the lab sheet and recognize the methods used in the experiments. (P4, PLO4) 2. Prepare a proper technical report based on data from experiment. (P2, PLO10) 3. Demonstrate ability to lead a team to complete the assigned tasks or assigned project during practical work sessions. (A3, PLO9)
24	DJL30062 PIPE DRAFTING & DESIGN	PIPE DRAFTING & DESIGN is planned so that the student shall acquire sufficient skill in various aspects such as background understanding in designing, developing and creating process flow diagram (PFD), piping and instrumentation diagram (P&ID), and plant 3D drawing. This will emphasize knowledge and clear understanding of the design and engineering principles used in plant layout and piping design. Credit(S): 2 Pre-Requisite(S): None	<ol style="list-style-type: none"> 1. Perform the experiments correctly according to the lab sheet and recognize the methods used in the experiments. (P4, PLO4) 2. Prepare a proper technical report based on data from experiment. (P2, PLO10) 3. Demonstrate ability to lead a team to complete the assigned tasks or assigned project during practical work sessions. (A3, PLO9)
25	DJL40032 POWER PLANT ENGINEERING 2	POWER PLANT ENGINEERING 2 guides students to understand and comprehend in detail the working principle of the components' basic equipment and the additional equipment contains in a power plant and processing plant. The learning components cover the functions and classification of the pump, compressed air plant, fuel and combustion, nozzle, refrigeration and air conditioning. Credit(S): 2 Pre-Requisite(S): DJL30032	<ol style="list-style-type: none"> 1. Explain the fundamentals of rotating equipment and auxiliary system in power plant. (C2, PLO1) 2. Solve the problem in a power plant regarding the pump, compressed air plant, fuel and combustion, nozzle, refrigeration and air conditioning by using formulation and theoretical. (C3, PLO2) 3. Demonstrate continuous learning and information management skills while engaging in the new knowledge and case study in power plant. (A3, PLO12)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
26	DJL40052 INSTRUMENTATION	<p>INSTRUMENTATION exposes students to the basic principles of equipment and control systems and also the process of inspection, maintenance, installing and measuring the equipment's system. The components of learning cover the basic terms of plant control, measurement of fluid pressure, measurements of liquid level, measurement of fluid flow and measurement of temperature.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Explain the fundamental of instrumentation, the static characteristics and measurement error in instrumentation. (C2,PLO1) 2. Apply the principle and working operation of specialized measurement system in plant applications for pressure, level, flow, and temperature measurement. (C3,PLO3) 3. Demonstrate an effective communication skills while engaging in the new knowledge and skills through technical presentation. (A3,PLO10)
27	MPU21032 PENGHAYATAN ETIKA DAN PERADABAN	<p>PENGHAYATAN ETIKA DAN PERADABAN ini menjelaskan tentang konsep etika daripada perspektif peradaban yang berbeza. Ia bertujuan bagi mengenal pasti sistem, tahap perkembangan, kemajuan dan kebudayaan merentas bangsa dalam mengukuhkan kesepaduan sosial. Selain itu, perbincangan dan perbincangan berkaitan isu-isu kontemporari dalam aspek ekonomi, politik, sosial, budaya dan alam sekitar daripada perspektif etika dan peradaban dapat melahirkan pelajar yang bermoral dan profesional. Penerapan amalan pendidikan berimpak tinggi (HIEPs) yang bersesuaian digunakan dalam penyampaian kursus ini</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Membentangkan konsep etika dan peradaban dalam kepelbagaian tamadun 2. Menerangkan sistem, tahap perkembangan, kesepaduan sosial dan kebudayaan merentas bangsa di Malaysia 3. Mencadangkan sikap yang positif terhadap isu dan cabaran kontemporari dari perspektif etika dan peradaban.
28	MPU22012 ENTREPRENEURSHIP	<p>ENTREPRENEURSHIP focuses on the fundamentals and concept of entrepreneurship in order to inculcate the value and interest in students to choose entrepreneurship as a career. This course can help students to initiate creative and innovative entrepreneurial ideas. It also emphasizes a preparation of a business plan framework through Business Model Canvas.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Propose the value proposition of entrepreneurial idea using Business model Canvas. (A3,CLS3b) 2. Develop a viable business plan by organizing business objectives according to priorities. (A4, CLS4) 3. Organize the online presence business in social media marketing platform. (A3, CLS4)

NO.	COURSE	SYNOPSIS	COURSE LEARNING OUTCOMES
29	DJJ 50193 PROJECT 2	<p>PROJECT 2 is a continuation of Project 1 focusing on project planning, development, project report and presentation. This course introduces students with ability and skills in conducting project planning, development and management based on their project design. It also provides the student with technical writing and presentation skills. The project will be implemented in a group and each group will work on a project under lecturer(s) supervision. Project titles will be based on specialization and students will be assessed individually.</p> <p>Credit(S): 2 Pre-Requisite(S): None</p>	<ol style="list-style-type: none"> 1. Demonstrate appropriate and creative solution in solving project problems. (P5, PLO3) 2. Perform project plan to achieve objectives with valid and reliable results. (P4, PLO4) 3. Explain the project work and defend project outcomes effectively with good communication skills. (A4, PLO10) 4. Organize project activities and outcomes in report accordance to the specified standard format that applies engineering management principles. (P4, PLO11)
30	DJL50033 POWER PLANT ENGINEERING 3	<p>POWER PLANT ENGINEERING 3 provides knowledge and understanding of theory, concepts and application of power generation in steam power plant, gas turbine power plant, air standard cycle, diesel power plant, steam turbine and heat transfer. The emphasis of the course is to determine cycle efficiency and the effect of additional equipment on the power generation related to thermodynamic processes.</p> <p>Credit(S): 3 Pre-Requisite(S): DJL40032</p>	<ol style="list-style-type: none"> 1. Explain the applications, main components, layout and process of various types of power plants and steam turbine. (C2, PLO1) 2. Solve thermodynamics problems using formulation and theory in steam power plant, gas turbine power plant, air standard cycle, diesel power plant, steam turbine and heat transfer. (C3, PLO2) 3. Demonstrate continuous learning and information management skills while engaging in the new knowledge of power generation. (A2,PLO12)
31	DJL50053 PLANT CONTROL SYSTEMS	<p>PLANT CONTROL SYSTEM provides knowledge on the basics of control systems and the relevant general terminologies. It shall include a representation of systems in a block diagram, explaining the dynamic behavior of control systems and the behavior of control elements. Included also is a classification of controllers by types and modes. The student shall be further introduced to the complex control system.</p> <p>Credit(S): 3 Pre-Requisite(S): DJL40052</p>	<ol style="list-style-type: none"> 1. Distinguish the fundamental of control systems and their respective characteristics. (C3, PLO1) 2. Construct block diagrams and derive mathematical models to represent the behaviors of plant control systems. (P3, PLO3) 3. Manipulate various types of control elements, controllers and complex control methodologies in order to perform corrective actions to minimize errors in control system. (A3, PLO7)

8.0 SUPPORT SERVICES

8.1 STUDENT AFFAIRS DEPARTMENT (HEP)

The Student Affairs Department basically has two main wings namely:

a. Admission and Data

The main function of this unit is to conduct the admission process efficiently and effectively. The process is conducted twice a year. Coordination and consultation with all the Head of Academic Departments is done in order to ensure the maximum enrolment of students.

b. Welfare and Discipline

The responsibilities of the Welfare and Discipline include the following:

- Scholarship and Education
- Insurance Policy
- Orientation Week
- Discipline
- Welfare
- Registration Of Student Vehicles
- Students' Representative Council

Each student will be covered under the insurance scheme known as *Accident Takaful* and *Family Group Takaful*. Insurance Policy from Takaful Company has been selected to cover the scope and amount of coverage as follows:

Company	Scope	Sum Assured
Takaful	Death caused by accident	RM20,000.00
Malaysia	Total Permanent/ Disablement	RM20,000.00
Premium: RM15.00 yearly	Burial expenses	RM1000.00
Students are insured 24 hours during their studies in POLIMAS	Medical Expenses	RM1000.00 @ RM40.00 per day

Actions to be taken during the occurrence of accidents are as follows: -

- a. Students can get treatment from government or private hospitals in case of accidents.
- b. Academic Advisors / Coordinators of Welfare / Students / Students Next Kin of Guardians/ Guardians must report the accident to the Student Affairs Department (HEP), POLIMAS within 14 days from the date of accident. HEP will notify Takaful within 30 days after the report is made for further actions to be taken.
- c. In the case of the student's location is far from POLIMAS and he or she may want to apply for claims from insurance companies, POLIMAS will hand the "Insurance Claim Form" to the student / family / guardian for follow-up actions. The completed claim form and supporting documents can be delivered or mailed to HEP POLIMAS.

Documents that need to be attached with the claim form are: -

- a. A copy of the identity card and student card
- b. A copy of the police report / industry
- c. A copy of driver's license
- d. Doctor report / Original medical bills
- e. A copy of discharge letter
- f. A copy of the death certificate / post mortem
- g. Pictures (scene location / physical)

8.2 EXAMINATION UNIT

Each Polytechnic Ministry of Education is responsible for providing guidance on learning, assessment, control and conduct of the examination. Certificate and Diploma to each student is subject to approval and confirmation of Board of Examination and Certificate / Diploma Polytechnic after students have passed all examinations and meet all the requirements of the course. For a polytechnic, Examination Unit is the unit where responsible for planning, managing and implementing all activities related to student assessment based on the guidelines and evaluation set.

Grading System:

Marks	Grade Points	Grade	Status
90-100	4.00	A+	Excellent
80-89	4.00	A	Excellent
75-79	3.67	A-	Distinction
70-74	3.33	B+	Distinction
65-69	3.00	B	Distinction
60-64	2.67	B-	Passed
55-59	2.33	C+	Passed
50-54	2.00	C	Passed
47-49	1.67	C-	Passed
44-46	1.33	D+	Passed
40-43	1.00	D	Passed
30-39	0.67	E	Failed
20-29	0.33	E-	Failed
0-19	0.00	F	Failed

Complete information about Examination Unit can be referred to **ARAHAN-ARAHAN PEPERIKSAAN DAN KAEDAH PENILAIAN**.

8.3 LIAISON & INDUSTRIAL TRAINING UNIT

The Liaison & Industrial Training Unit (UPLI) is responsible for managing students' industrial training affairs. Students will be assigned to a particular organization during their training period based on their respective fields of study.

The placement process is finalized before training commences. Students are constantly advised to maintain a high level of discipline. They should abide by the rules and regulations of both the polytechnic and organization. Organizations are advised to consult the polytechnic immediately if there are any disciplinary problems.

Complete information about Liaison & Industrial Training Unit can be referred to ***PENGURUSAN DAN KAEDAH PENILAIAN LATIHAN INDUSTRI POLITEKNIK.***

8.4 LIBRARY UNIT

POLIMAS library provides academic resources and services to all students, staff and other members of POLIMAS community. The library provides quality and up to date information to everyone in terms of managing and providing access to information resources. Taking the role as a centre of knowledge, the library acts as a catalyst and assist in the teaching and learning and research in the process of producing creative and innovative semiprofessional.

Business Hour:

Sunday-Wednesday	8.30am – 4.45pm
Thursday	8.30am – 3.15 pm
Friday, Saturday and Public Holiday	Closed

8.5 PSYCHOLOGY, COUNSELING AND CAREER UNIT

The main objective of the Psychology, Counselling and Career Unit is to facilitate students' self-development by helping them make the most of their polytechnic experiences. This unit offers to help students in finding and searching for alternative ways to overcome their emotional and psychological difficulties in dealing with problem encountered during their course of study at the polytechnic, guiding students in their career planning as well as helping the acquire better access to the job market in the private and public sectors. The unit helps students to exercise self-determination, achieve and realize their potentials and become positive contributors to the society.

Psychology, Counselling and Career Unit is ready to guide and help students to overcome existing challenges in campus. It is hoped that through the counselling and consultation process offered by this unit, the students are able to achieve:

- Understanding of oneself
- Developing awareness of self-potential
- Able to make wise decision
- Actively participate in academic and co-curriculum activities

8.6 HALLS OF RESIDENCE UNIT

The management and administration consist of two parts:

- a. Hostel management manage the hostel building and equipment
- b. Hostel resident management in-out management, welfare activities, discipline and the resident security.

About 1100 new students been offered to stay at hostel with ratio 550 boys and 550 girls.

All information about support services and be referred to ***BUKU PANDUAN DAN PERATURAN AM.***

EDITORIAL COMMITTEES

Chairman : Wan Abdul Aziz Bin Wan Kadir (Head of Department)

Editors : Ku Nasharudin bin Ku Hamid @ Ku Ismail (Head of Programme)
